

NEPC INDIA LTD

GRID INTERACTIVE SOLAR ROOFTOP SYSTEM

NEPC Grid-interactive Solar System as the name suggests is a system which provides electricity 24X7 in places with long-hour power cuts. The solar batteries can be charged by solar PV modules and also with the Grid power. The Solar hybrid inverter is designed to give the first preference to Solar, second to batteries and third to Grid power.

ADVANTAGES OF NEPC GRID INTERACTIVE SOLAR ROOF TOP SYSTEMS

- Rooftop Solar has 80% accelerated Depreciation in 1st Year
- The solar system provides a stand-alone power supply for all users, which is independent, reliable and stable
- User shall not rely on grid power any more
- The system operates with low maintenance for a long span of time
- Environmentally friendly - No noise, No smoke,
- No pollution, No electricity bills
