

NEPC India Limited

NEPC India Limited is a Public Limited Company located in Tamil Nadu. The company supplies Solar Photovoltaic panels based in India. NEPC India Limited is listed as a Registered Solar Integrator with Tamil Nadu Energy Development Agency (TEDA) for supply, installation and commissioning of Solar Photovoltaic Devices as per the specifications specified by the Ministry of New and Renewable Energy (MNRE) in India.

NEPIC consists of a Group of Technocrats and management experts with considerable experience in Renewable Energy, presently specializing in the area of supply and erection of High quality Solar PV Panels and is now well known in the Solar Industry.

Products & services

The complete range of Products & Services are:

- NEPC's Solar Division has developed its own Module Mounting Structure which is cost effective and can also be installed quickly. The product has been designed after extensive research and development which contributes to the product being light weight, rust & corrosion free, long lasting, maintenance free, compact and is resistive to high wind speed and extreme conditions
- 1 KW to 10 KW – Solar Grid Interactive Systems with Energy storage and Energy export options
- 10 KW to 100 KW & Multiples – Solar Grid Interactive Inverter for Grid connected systems – Suitable for roof top,

ground mount & MW scale deployment even on roof tops is possible in grid interactive mode

- 10 KW to 1 MW – Solar Grid tied Inverter for Grid connected systems – suitable for roof top, ground mount & MW scale deployment.
- Complete turnkey project solutions for

SPV roof top, ground mount and MW scale projects. – such as Site inspection, design, mechanical structures, junction boxes, cables, AC & DC Decoupling circuits and systems, lighting arrestors, earthing kits, etc.

- Energy efficient Solar Street and Garden Lighting Systems
- High Efficiency Wind turbine Generators

For further details on our products and services, please visit the company website: www.nepcindia.com

Company's commitment

All products meet all required Standards like IEC 61215, IEC 61730, and IEC 61701 and have the required certifications from internationally recognized laboratories and certification authorities

Company's collaborations

NEPC India has partnered with REN Electron, Italy for technology understanding; thereby providing state-of-the-art solutions to the Indian Solar Market.

The joint aim is to facilitate reaching the target set by the Government of Tamil Nadu to generate 3000 MW of electricity from Solar Energy in the next three years.

NEPC with its expertise has appointed distributors in Turkey, Italy, Central America, UK, Ireland and USA and is in the process of appointing distributors in the other countries soon.

NEPC participates in International Wind Trade Fairs across the globe to promote its products and to appoint qualified distributors who will partner with customers right from installation to post warranty maintenance services.
